

QUIBIC - QSAR Services

Valid through 31st December 2019

Service	Price*
Bibliographical search	\$ 1,356.00 USD
Price includes: Toxicity report (COFEPRIS** format) with the relevance of the impurities, obtained from bibliographical information. Price includes up to 10 impurities Add \$ 125.00 USD per extra impurity	
QSAR study	\$3,345.00 USD
Price includes: Theoretical determination of the oral acute toxicity in rat, from a QSAR study following the OECD principles and the COFEPRIS format requirements. Price corresponds to one model. The number of models is determined according to the structural similarity of the molecules, and defined by the technical team on case by case bases.	
Response to technical requirements of QSAR studies from COFEPRIS	\$119.00 USD - \$711.00 USD
Price includes: Revision of the official requirement from the Authority and proposal of the technical response, following OECD principles and COFEPRIS specifications. Once the requirement is reviewed, a technical and economical proposal is sent to the petitioner, for authorization. Finally, documentation is prepared, reviewed, and submitted to the customer.	
Revision of dossier studies with theoretical predictions	\$444.00 USD
Price includes: Revision of QSAR studies performed by third parties to be submitted to COFEPRIS. Adherence to OECD principles is also reviewed.	
Addendum	\$105.00 USD - \$630.00 USD
If COFEPRIS requires further modification of the report, or additional explanation of a particular case within the conclusions of the study, an addendum can be made. The price of this document will be subject to evaluation of the QSAR team.	

*Displayed prices do not include taxes; for the full price, add 16% tax.

**COFEPRIS stands for Comisión Federal para la Protección contra Riesgos Sanitarios (Federal Commission for the Protection against Sanitary Risk). It is the authority responsible for regulating health related issues, similarly as the FDA does in the United States.
